**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Genster (6138618). Figure 3-2 shows a pump circulating coolant between regenerator LTW and the I.C.E. with valves v1 and v2 controlling flow through the radiator and compartment heater HWT. The valves are seen to be two-way valves as evidenced by their location at flow junctures wherein the radiator and HWT are blocked during engine preheating.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Genster as applied to claim 4, and further in view of Hofele (DE 4105199). The construction of valves v1 and v2 are not set forth. Hofele is merely cited as an example of the well known use of thermostatic two-way valves 6,7 for controlling flow and are known to be a simple and cost

efficient solution for controlling flow according to temperature; therefore, it would have been obvious to one of ordinary skill in the art to do likewise in Genster.

### ***Response to Arguments***

Applicant's arguments filed 9/3/04 have been fully considered but they are not persuasive. That applicants argue that valve 9 of Genster fails to restrain circulation of the heat medium into a heat exchanger either when the engine is stopped or cold. The applicants fail to properly address the rejection. The examiner applied the embodiment of figure 3-2. As is evident, valve V1 may, at the option of the operator, restrain the heat medium to the heat exchanger at any time so that only the engine is heated up. The heating of the passenger compartment is merely an option.

### ***Allowable Subject Matter***

Claims 7, 8, 11, 12, 14, 16-19 are allowed.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
